PROFILE

I am an undergraduate student at NED University, pursuing a Bachelor's degree in Computer Science and Information Technology. I am skilled in programming, particularly web development, and have experience in affiliate marketing. Additionally, I possess strong communication skills, enabling effective collaboration and idea sharing within team environments.

PROJECTS

QuranVison

- A full-stack Islamic web app featuring role-based access, Quran/Hadith content, blogs, e-commerce, and learning plans with Firebase Auth and API integration.

Opti Manage – Brand Management Platform

- Developed a responsive website for a brand management company to highlight influencer, sports, and digital marketing services with modern UI/UX.

Dream Fragrance

- Developed a full-stack perfume e-commerce website using React, Node.js, and PostgreSQL, with user and admin portals for product, order, and user management.

WORK EXPERIENCE

Web Developer Intern, Barret Hodgson

- Gained hands-on experience in building and deploying web applications using React, Node.js, and databases.

Content Creation

- Created engaging reels on Facebook, Instagram, and YouTube to promote affiliate products and boost engagement.

Online Python Instructor

- Taught the basics of Python online, covering fundamental concepts like variables, loops, and conditionals.
