SUMMARY

Computer Science undergraduate at NED University of Engineering & Technology with hands-on experience in full stack web development, having built and deployed multiple web applications. Proficient in the MERN stack and Next.js ecosystem, with additional experience in UI/UX design, brand development, and social media management. A collaborative team player with strong communication skills and a proven ability to deliver end-to-end technical solutions.

WORK EXPERIENCE

TribeSell — Full Stack Web Developer

April 2026 – Ongoing

- Currently developing a full-stack web-based management system for a Japanese car organization using React.js, Node.js, and PostgreSQL, focused on streamlining internal operations and managing end-to-end business workflows.
- Designing and implementing a multi-portal architecture with role-based access control, enabling different levels of system interaction and data visibility across various organizational roles.
- Building and integrating secure document management, automated email communication, and transactional data workflows to support the organization's day-to-day operational requirements.

Phantom Gambit — Full Stack Developer & Brand Associate

June 2025 – Ongoing

- Designed and developed the company's brand website, ensuring a modern, responsive, and user-friendly interface.
- Managed the brand's social media presence across platforms while contributing to UI/UX design decisions aligned with the brand's visual identity
- Guided and collaborated with the game development team throughout the development lifecycle, providing technical direction and support

Barrett Hodgson Pakistan Pvt Ltd — Web Development Intern

March 2025 – April 2025

- Gained hands-on experience in designing and implementing critical web application forms using React, Node.js, and MySQL, focusing on form validation, user input handling, and interactive UI components.
- Implemented complex form workflows including submission, approval, and rejection flows, ensuring secure and reliable handling of user data and actions.
- Developed mechanisms for tracking form status and notifications, providing real-time feedback to users and streamlining the process of form acceptance or rejection.

EDUCATION

NED University

Bachelors in Computer Science and Information Technology

2022–PRESENT

Tabanis College

Pre-Engineering, Karachi Board

2020–2022

The City School

O- Levels, Pre-medical

2019 — 2020

CERTIFICATIONS

The Complete Full-Stack Web Development Bootcamp — Udemy

Instructor: Dr. Angela Yu • Issued: May 2025 • 61.5 Hours • [View Certificate](#)

PROJECTS

QuranVision – Islamic Web Application

- Developed a full-stack Islamic web application using React for the frontend and Node.js with Express.js for the backend, with data stored in MySQL.
- Implemented role-based authentication and authorization using Firebase Authentication, enabling separate admin and user functionalities within the application.
- Built multiple modules including Quran and Hadith content integration, blogs, an Islamic store (e-commerce), and structured learning plans, with external API integration for dynamic Islamic content.

Anonymous Messaging Platform – Full Stack Web

- Built a full-stack anonymous messaging web app using Next.js and MongoDB, featuring secure authentication with NextAuth.js, JWT, Zod validation, and email verification via Resend.
- Developed a user dashboard to view messages, control message acceptance, and share a personalized link.
- Integrated AI-powered message suggestions using NVIDIA NIM (LLaMA 3.1) to boost engagement with dynamic prompts.

MYP (Manage Your Priorities) – Contact & Client Management System

- Built a full-stack contact & client management system using Next.js, Supabase, and Tailwind CSS, with secure JWT-based authentication and role-based access.
- Implemented an AI-based contact parser using LLaMA 3.1 (meta/llama-3.1-8b-instruct) to convert unstructured text into structured contact data.
- Developed a dashboard with contact tracking, Kanban task management, scheduling, and real-time notifications for streamlined workflows.

Dream Fragrance – E-Commerce Web Application

- Developed a full-stack perfume e-commerce website using React for the frontend and Node.js with Express.js for the backend, with data stored in PostgreSQL.
- Implemented secure authentication using Firebase Authentication and integrated email services using Nodemailer for notifications and communication.
- Built separate user and admin portals enabling features such as product management, order processing, and user management.

Simon Game – Memory Based Web Game

- Developed a Simon Game using HTML, CSS, and JavaScript, providing an interactive memory-based gameplay experience with visual and audio feedback.
- Implemented dynamic game logic and score tracking, enabling users to test and improve their memory skills in a responsive and engaging interface.

SKILLS

- **Languages:** JavaScript, TypeScript, HTML, CSS, SQL, Python, C/C++
- **Frameworks & Libraries:** Next.js, React, Node.js, Express.js, Zod, JWT, NextAuth.js
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Tools & Platforms:** VS Code, Git, GitHub, Postman, Cursor, Antigravity
- **Services & Integrations:** Firebase, Nodemailer, EmailJS, Resend
- **Design:** Canva, UI/UX Design
- **Soft Skills:** Problem-Solving, Leadership, Team Collaboration, Adaptability
